Convention Cover & Dashboard Header.....	04
Custom Tiles on the Dashboard.....	05
Picture Gallery & Participants / Speakers	06
Sponsor & Exhibitor Logos	07
Location Map, Custom Pages & Weather Forecast	08
PDF Documents & Videos	09

Startscreen & Overlaying Logo

1. Startscreen

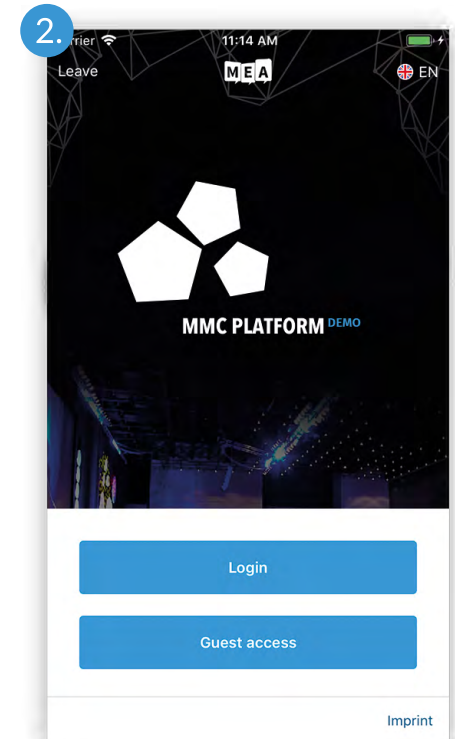

Choose a meaningful and inviting start image. Users will see this first when opening the app. A full-surface key visual with a low text content is the best choice here.

Dimensions: 1600 x 3400 px (trim at top or lower)
1707 x 2560 px (lateral cutting)

2. Overlaying Logo

If desired, your logo can be displayed over a large area at the start of the login process. This gives you the opportunity to present yourself to the user again as the organizer.

Dimensions: 1600px width, png-format

Desktop Experience & App-Icon

1. Desktop Experience

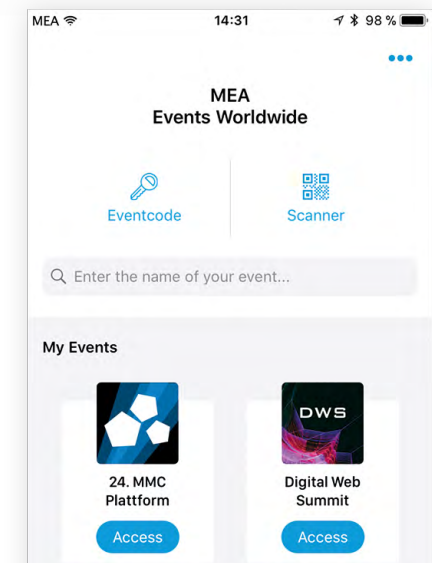

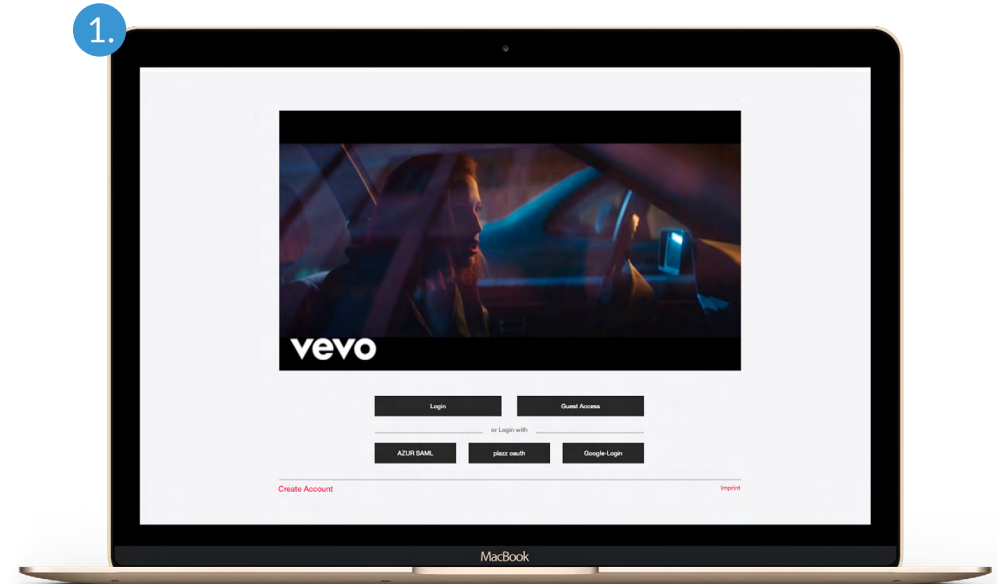

To give desktop users of the web app an even more impressive start to your event, the Desktop Experience was developed. In addition to a large area for your image, the respective login fields that you have configured beforehand can be found just below. The Desktop Experience is activated via a button in the configuration view of the start screen.

Dimensions: 2048 x 1152px, jpg/png

2. App-Icon

Choose a memorable and easily identifiable design for the app icon. For the sake of readability, avoid too much text and use a matching logo. This ensures that users can easily recognize and find your app.

Dimensions: 1600 x 1600px, jpg, without rounded corners

Convention Cover & Dashboard Header

1. Convention Cover

The convention cover appears as a header in the app menu and in the event list. Your key visual, for example, can be used for this purpose. This increases the recognition value of your event for the users.

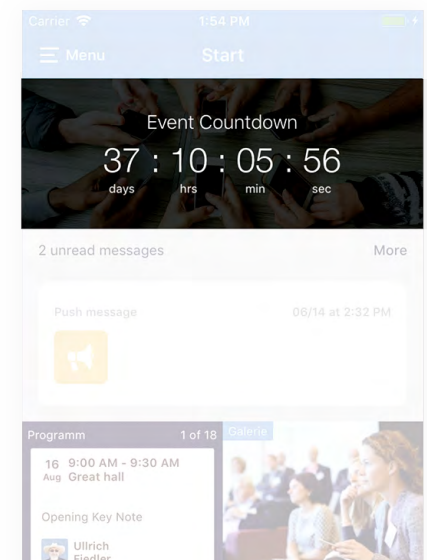

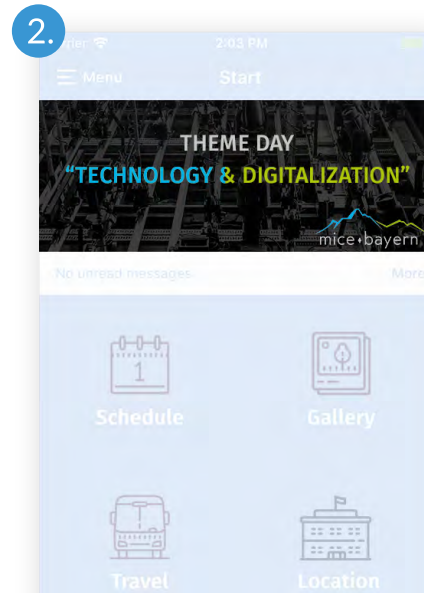

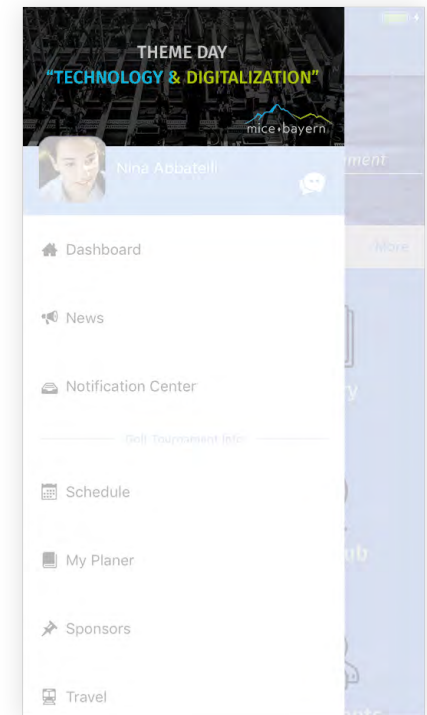

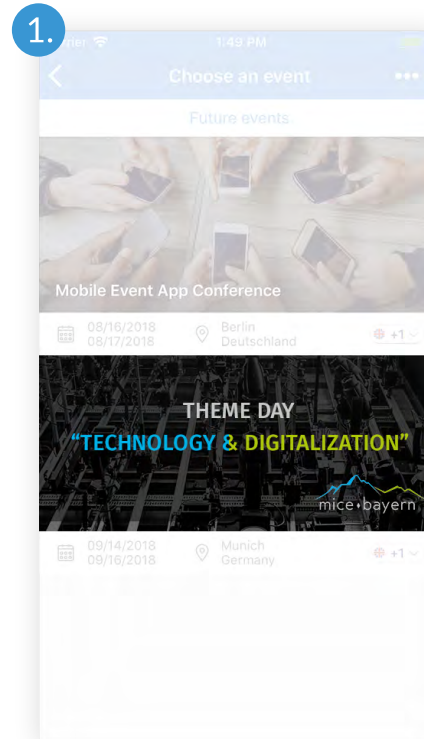

Dimensions: 1242 x 544px, jpg/png-format

2. Dashboard Header

For the header graphic on the dashboard you can either choose one of our sample images or use an individual image, to which you can also add a suitable text, such as the title of the event or a greeting.

You can customize the latter with the help of the individual dashboard header and greet each guest personally with their first and/or last name. Before the event there is the possibility to include a countdown for the time until it begins.

Dimensions: 2304 x 855px, jpg-format

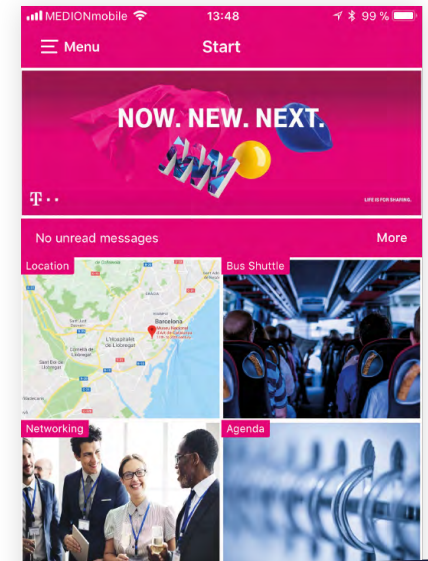

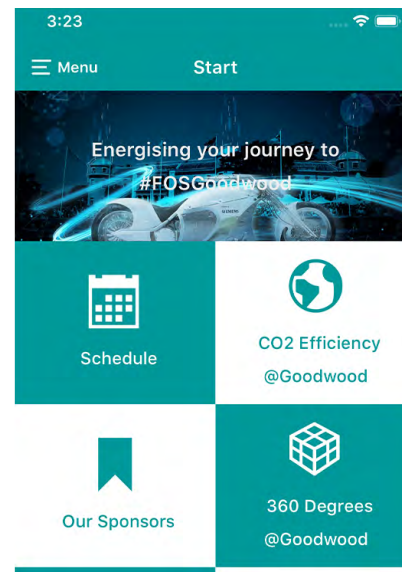

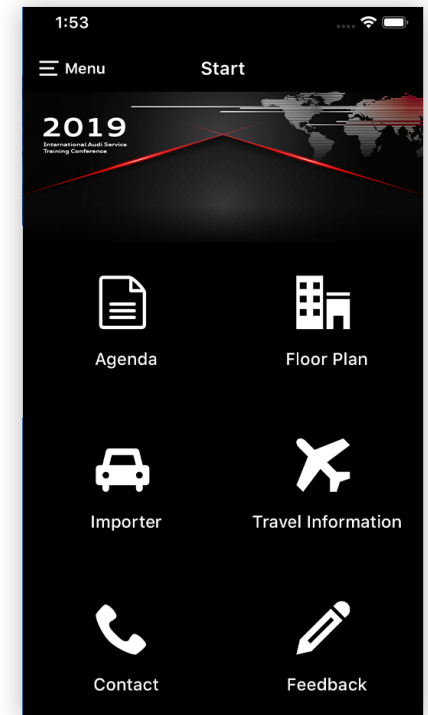

Custom Tiles on the Dashboard

1. Custom Kacheln

The tiles on the dashboard, which re direct to different menu items, can be designed according to your ideas. The tiles are arranged either below each other (2x1 tiles) or next to each other (1x1 tiles).

It is up to you whether you use the given tiles or ask your graphics department to create individual tile graphics.

Dimensions: 2304 x 930px, jpg-format (2x1 tile)
1152 x 930px, jpg-format (1x1 tile)

Picture Gallery & Participants / Speakers

1. Picture Gallery

Add the highlights of your event as photos in the gallery and make them accessible to everyone.

Dimensions: max. 3000px width, jpg/png-format, max. 10MB per picture

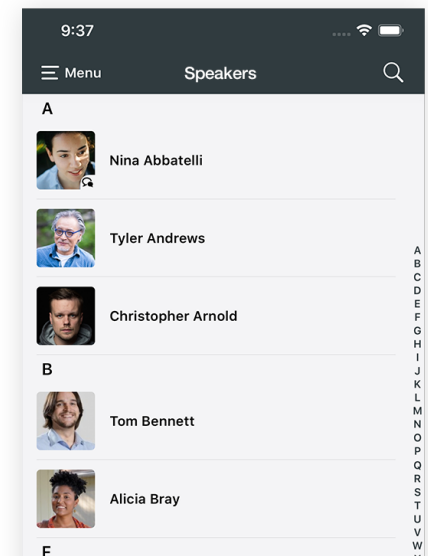

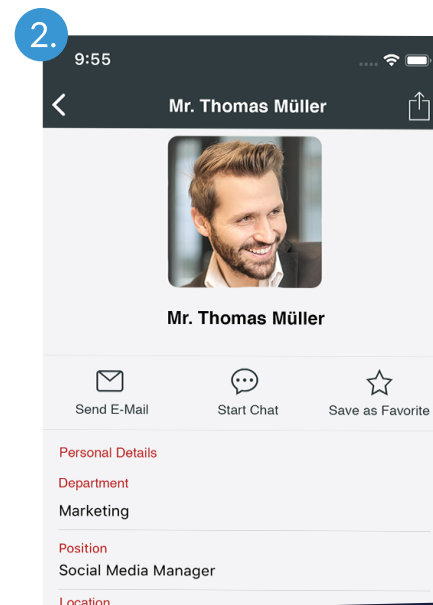

2. Participants/Pictures of speakers

The users of the app can add a profile picture to their profile in addition to information about themselves.

This means that they are shown with their photo in the list of participants or speakers and can be identified more quickly by other users.

The pictures of participants and speakers can be stored in advance during the import to ensure a uniform presentation.

Dimensions: 512 x 512px, jpg/png-format, max. 512kb per picture

Logos for Sponsors & Exhibitors

1. Sponsor Logos

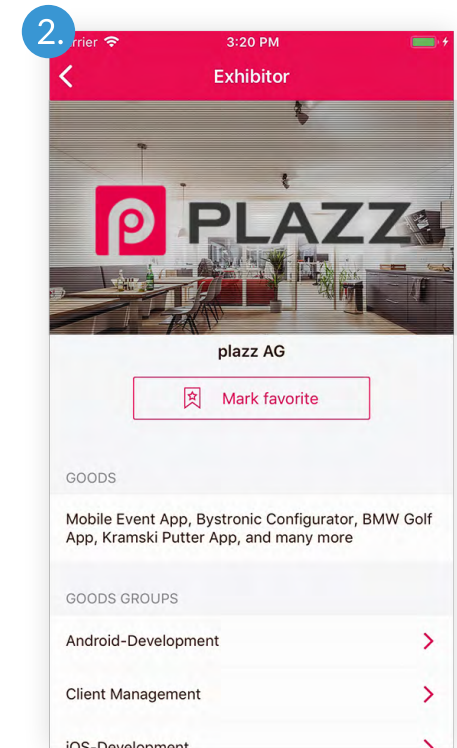

Add your sponsor logos to show who supports your event. This is also an ideal opportunity for your partners to present themselves to the participants.

Dimensions: ca. 768 x 768px, jpg/png-format

2. Exhibitor Logos

The exhibitor logos will also find a place in the app. This gives app users a good overview of the exhibitors at the event.

Maße: ca. 960 x 540px, jpg/png-Format

Location Map, Custom Pages & Weather Forecast

1. Location Map

Location maps make it easier for your participants to find their way around the event. Upload the necessary maps and add interactive Points of Interest, which are linked on the map and give users information about the location as well as linked agenda items when clicking on them. The horizontal format is best suited for this purpose.

Dimensions: max. 3000 x 3000px, jpg/png-format

2. Custom Pages

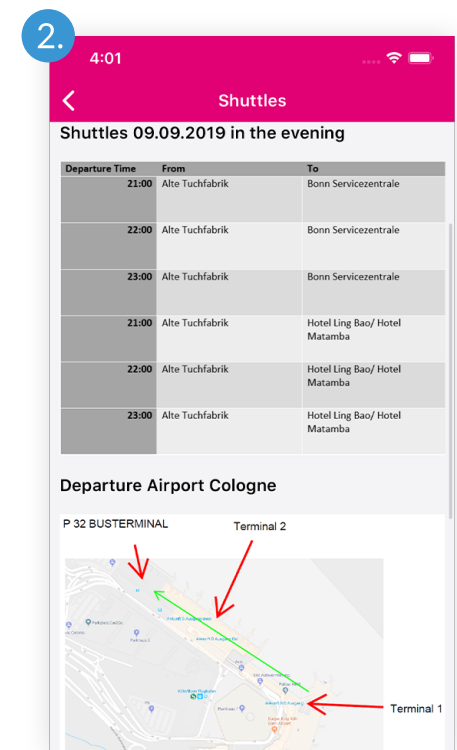

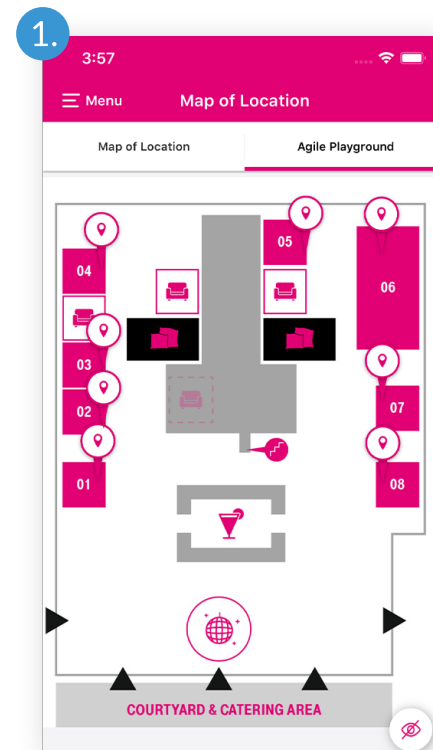

You can design custom pages individually: For example, provide maps, information about the event location or other additional information for your participants. Of course, you also have the option of integrating graphics.

Dimensions: max. 2000 x 2000px, jpg-format, maximum 1MB

3. Weather Forecast

Illustrate the weather forecast with a suitable picture of the event location or the surrounding environment.

Dimensions: 3000 x 1286px, jpg/png-format

PDF Documents & Videos

1. PDF Documents

Use the possibility to make documents like handouts, annual reports, brochures etc. available in the app to save printing costs.

Dimensions: pdf-format, maximum 2-3MB

2. Videos

In addition to images and documents, videos can also be uploaded to the app. Whether tutorials, corporate videos or event highlights – videos can make your app even more informative!

Dimensions: mp4-format or Youtube-ID,
maximum 500MB per custom page
